

Three Pillars. One Path.

01 Hands-Free Harmonica

Respiratory strengthening and musical expression for people with high-level spinal cord injury. Expression opens the door to deeper creativity and inner work.

02 Guided Imagery Programme

Directed mental practice to stimulate nerve pathways and support movement and sensation after SCI. Works with the body's natural rhythms of rest and receptivity.

03 Quality of Life Research

Twenty-five years of evidence on what actually helps people flourish after spinal cord injury. The foundation underneath everything.

Harmonica trains the breath. Breath opens the door to imagery. Imagery changes the body and mind.
